

RETAIN Message 06-14

6 December 2005

SUBJECT: RETAIN Hardware Requirements

1. The current RETAIN III requires more system resources than when initially released. Updated operating systems and Commercial off the Shelf (COTS) software have increased their need for system resources.

2. Minimum configuration for the RETAIN 3 system. New computer purchases should have:

Windows 2000/NT/XP
2 GHz Processor
24X CD Reader/Writer
512 MB RAM
60 GB Hard drive
64 MB Video Card
Keyboard
Mouse
PDF Writer

3. It is strongly recommended that Career Counselors receive Notebook Computer with Docking Station or Mobile Port Replicator for use at home station and during deployments. A notebook computer provides mobility of current files and will ensure that Retain files are always up-to-date.

4. Point of Contact is MSG Whitehouse at DSN 221-6951.
